ClaimSaathi

PAYTM BUILD FOR INDIA AI HACKATHON · TRACK 2

Know what your insurer will pay before you file.

An AI companion for health insurance claims. It reads the hospital bill, checks every line against your policy, explains each cut in your language, and fights the ones that are wrong.

AI-Powered Financial Journeys | Insurance | English · हिंदी · 8 more

Bengaluru · October 2026

PROBLEM STATEMENT

Families learn the rules of their policy at the billing desk.

₹26,037 cr

of health claims rejected or disallowed in FY24, up 19% in a year

IRDAI Annual Report 2023-24, via Lok Sabha reply

43%

of policyholders who claimed in 3 years faced hurdles getting paid

LocalCircles survey, 2024, ~39,000 responses

31,490

health insurance complaints to the Insurance Ombudsman in FY24, up 21.7%

Council for Insurance Ombudsmen, FY24

Why?

- **Room-rent limits** silently cut doctor, OT and nursing fees by the same proportion
- **Non-payable items, co-pays, sub-limits, waiting periods** buried in 40-page wordings
- **Missing papers:** insurers disallowed 12.9% of claim value; few people know how to contest

PROPOSED SOLUTION

One companion for the whole claim journey

01 · READ

Snap the bill

Vision AI reads every line of the itemised bill. Upload the policy PDF, or use the one already on Paytm.

02 · PREDICT

Know the payout

A rules engine applies the policy and IRDAI rules line by line. Every rupee cut cites a clause.

03 · EXPLAIN

In your language

Ask by voice in Hindi or English: "कमरे का किराया पूरा मिलेगा?" Saathi answers with your numbers.

04 · PREPARE

File it right

Missing-paper checklist, deadlines, and the claim form Part A filled in.

05 · RECOVER

Fight wrong cuts

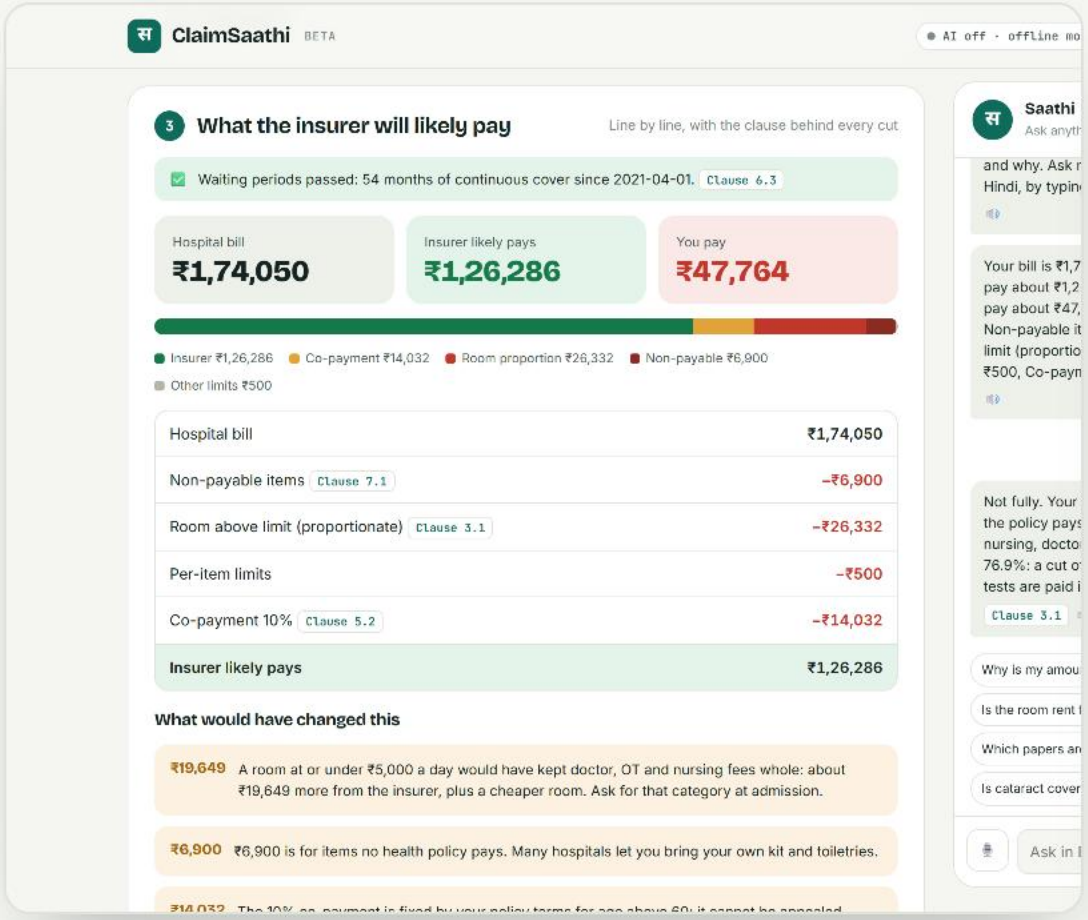

Paste the settlement letter. Saathi finds errors and drafts the grievance up to the Ombudsman.

DEMO CLAIM

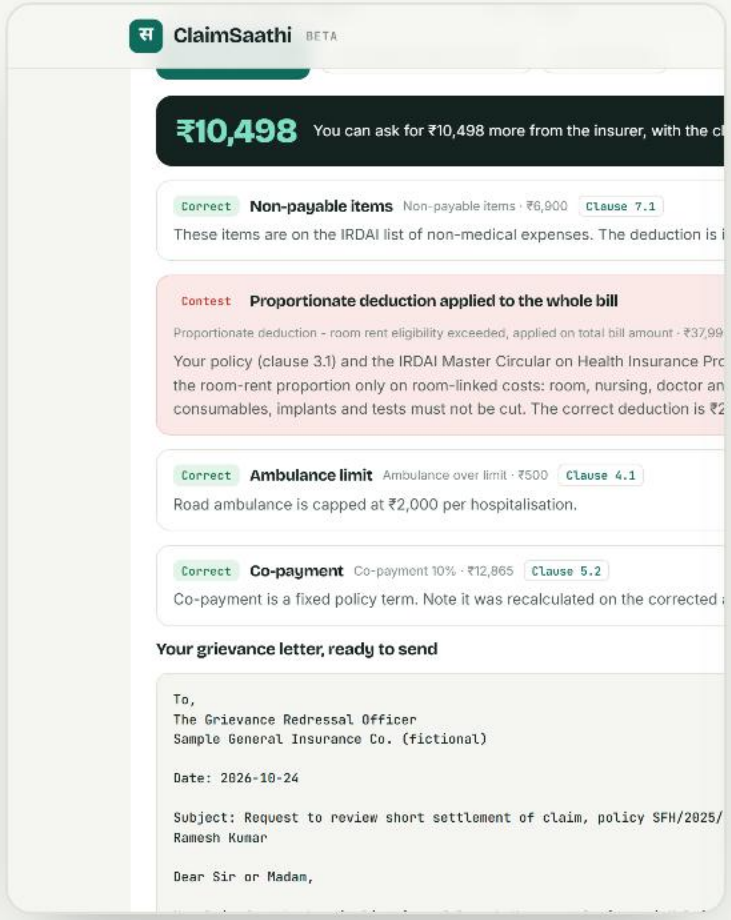

Appendectomy, 3 days, ₹1,74,050 bill. Saathi predicts **₹1,26,286** payable. The insurer pays ₹1,15,789. Saathi shows the proportionate cut was wrongly applied to medicines and tests: **₹10,498 recoverable**, grievance drafted.

WORKING PROTOTYPE

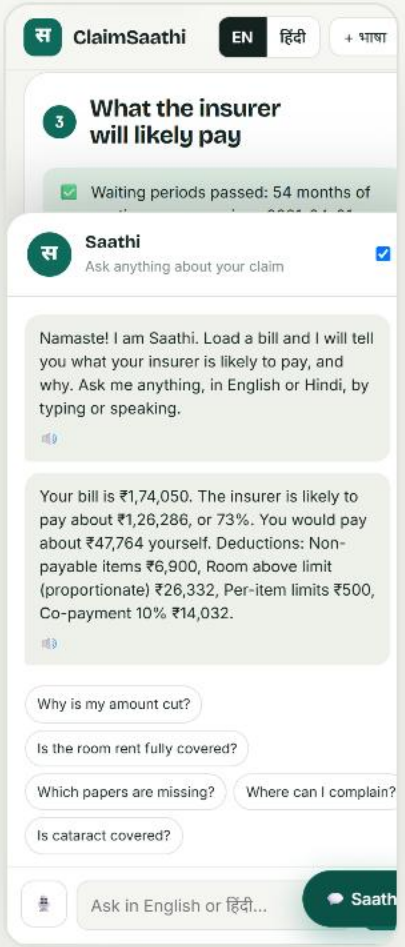

Built and running, online or offline

Payout estimate with a clause on every cut, and Saathi answering with the customer's own numbers

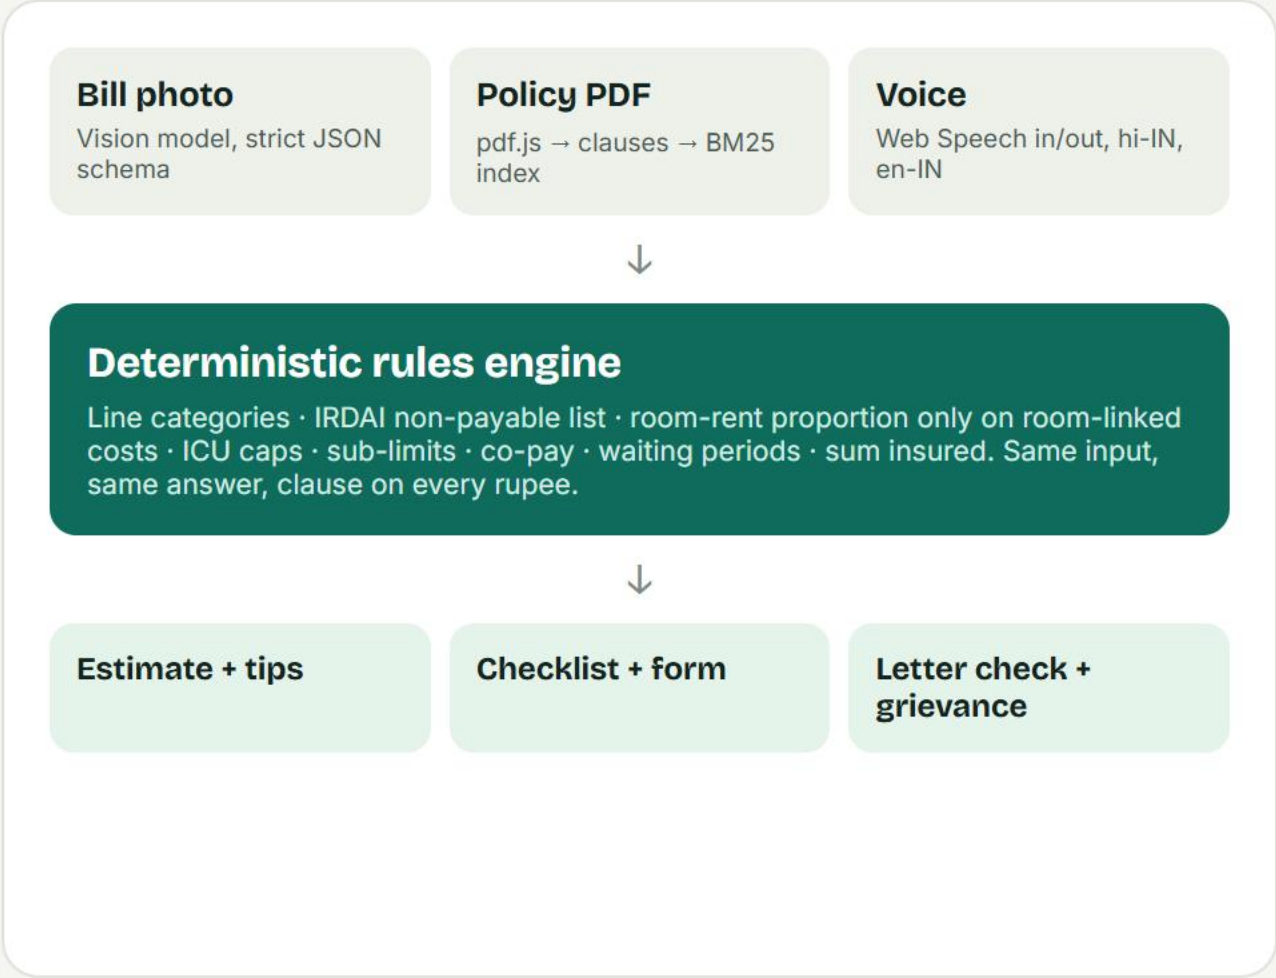

Settlement letter check: the wrong deduction, the amount to recover, the grievance

Mobile, in Hindi

AI reads and talks. Rules do the money.

Stack

- Node.js server, no framework, stateless
- OpenAI gpt-5-mini: vision, grounded Q&A, translation into 10 languages
- BM25 retrieval over policy clauses, with Hindi and Hinglish synonyms
- Vanilla JS, mobile-first, works offline in EN and HI
- 13 unit tests on the money logic

Why not let the LLM do the maths?

Money must be exact and auditable. The model only reads and explains; it never decides a rupee.

USP

Not a chatbot about insurance. A second opinion on your claim.

₹ Your numbers, not FAQs

Line-by-line payout from your bill and your policy, before you file. Others explain insurance in general.

§ A clause behind every rupee

Deterministic engine, IRDAI rules encoded, cited in every answer. No hallucinated money.

अ Voice-first, vernacular

Hindi and English offline; 8 more Indian languages with AI. Built for a 62-year-old patient's son at 11 pm.

↺ Recovers money after the fact

Checks the insurer's settlement letter, quantifies the error, drafts the grievance and escalation.

BUILT FOR PAYTM Policy, KYC and bank details already sit in the Paytm app: the claim form fills itself, and the payout lands in the same wallet the bill was paid from.

IMPACT & BENEFITS

Simpler, faster, more human, for everyone in the claim

CUSTOMERS

No surprises

- Out-of-pocket known before discharge
- Room choice advice: ₹19,649 more paid in the demo case
- Wrong cuts recovered: ₹10,498 in the demo case
- Free, in their language

INSURERS & TPAs

Cleaner files

- Fewer claims disallowed for missing papers (12.9% of value in FY24)
- Fewer complaints reaching the Ombudsman
- Faster processing: 72% of claims go through TPAs

PAYTM

Trust that compounds

- A reason to keep the policy on Paytm and renew
- Natural entry to better cover and medical EMI
- Supports IRDAI's push on claim transparency

3.26 cr

health claims filed in FY24

₹31,086

average paid per claim

40 cr

"missing middle" Indians with no health cover (NITI Aayog): first-time buyers who need this most

BUSINESS MODEL

Free for customers. Paid by better outcomes.

1 · DISTRIBUTION

Better cover, sold honestly

"Your plan caps room rent at ₹5,000." Saathi shows plans without the cap or co-pay. Paytm Insurance Broking earns the standard commission on each policy and renewal.

2 · GAP FINANCE

Medical EMI for the gap

The customer sees "you pay ₹47,764" before discharge. Offer a pre-approved medical EMI from Paytm's lending partners. Paytm earns its distribution fee.

3 · B2B API

Pre-check for insurers, TPAs, hospitals

Per-claim fee for a pre-submission check: line categories, missing papers, payout estimate. Fewer queries and re-submissions.

< ₹1

AI cost per claim: one vision read plus a few answers. The payout maths runs on rules, at zero model cost

₹650 cr

illustrative B2B pool: 3.26 crore claims a year × ₹20 per pre-check

0

new customer acquisition cost inside Paytm: offered where the policy and the hospital payment already are

Illustrative figures for discussion; commission and fee rates follow IRDAI and partner agreements.

TEAM & NEXT STEPS

Systems thinkers building for the moment that matters

Paras Adlakha

Aerospace, electronics, systems engineering. Built the rules engine, the bill reader and the app.

Harshita Adlakha

System dynamics, socio-technical systems. Mapped the claim journey, the IRDAI rules and the grievance path.

Recent builds: LineCheck (AI aircraft inspector on FaceTime, Beta Fund × AWS) and Fitted (Stripe × Supabase, Berlin).

Roadmap

- Finals: live bill photo → estimate, in Hindi, on a phone
- Pre-admission mode: compare room options before you choose
- Cashless desk mode for the 1-hour authorisation window
- Policy wordings for the top 20 retail health plans
- Validate estimates against real settled claims with a TPA partner
